

DISASTER RISK MANAGEMENT

About Disaster Risk Management (DRM) "

In order to manage and reduce its disaster risk, a country needs to have a disaster risk management strategy in place. This strategy should be based on a clear understanding of the disaster risk and the impact of disasters on the country. The strategy should also take into account the needs and priorities of the most vulnerable groups in the country. The strategy should be implemented through a series of measures, including disaster risk assessment, disaster risk reduction, disaster preparedness, disaster response, and disaster recovery. The strategy should be reviewed and updated regularly to ensure it remains relevant and effective.

Training Objectives Disaster Management Institutions

The specific objectives of the course are to provide participants with the knowledge and skills necessary to understand the basic concepts and terminology of disaster risk management and to be able to apply this knowledge in their own organizations.
